**STATE OF NEW JERSEY
BOARD OF PUBLIC UTILITIES**

IN THE MATTER OF THE PETITION OF : PETITION
NEW JERSEY NATURAL GAS COMPANY :
FOR APPROVAL AND AUTHORIZATION :
TO CONSTRUCT AND OPERATE THE : DOCKET NO.
SOUTHERN RELIABILITY LINK :
PURSUANT TO N.J.A.C. 14:7-1.4 :

**TO: THE HONORABLE COMMISSIONERS OF
THE NEW JERSEY BOARD OF PUBLIC UTILITIES**

By this Petition, New Jersey Natural Gas Company (the "Petitioner" or "NJNG") hereby requests that the New Jersey Board of Public Utilities (the "BPU" or the "Board"), pursuant to N.J.A.C. 14:7-1.4 (a) grant approval to install and operate approximately 28 miles of 30-inch transmission pipeline with a maximum allowable operating pressure ("MAOP") of 722 pounds per square inch gauge ("psig") that will be located in portions of the Township of Chesterfield ("Chesterfield"), the Township of North Hanover ("North Hanover"), the Township of Upper Freehold ("Upper Freehold"), the Township of Plumsted ("Plumsted"), the Township of Jackson ("Jackson"), and the Township of Manchester ("Manchester"), New Jersey (the "Southern Reliability Link Project" or "Project"); and (b) grant such approval on an expedited basis pursuant to N.J.A.C. 1:1-12.6.

In support of this Petition, NJNG states the following:

1. Petitioner is a corporation duly organized under the laws of the State of New Jersey. It is a public utility engaged in the business of purchasing, distributing, transporting and

selling natural gas to approximately 510,000 customers within its service areas in Monmouth and Ocean counties, and parts of Morris, Middlesex and Burlington counties.

2. Communications and correspondence relating to the proceeding herein should be sent to:

Jeffrey S. Chiesa, Esq.

3. Attached hereto in support of and made part of NJNG's Petition are the following exhibits:

Exhibit A – Alignment Drawings
Exhibit B – List of Structures within 100 Feet of Pipeline
Exhibit C – Pipeline Engineering Data Sheet
Exhibit D – Draft Form of Public Notice for Hearing
Exhibit E – Southern Reliability Link Project Alternatives Analysis

4. The Central and Ocean Divisions of NJNG extend from Monmouth County through Ocean County and portions of Burlington County. Currently, over 85% of NJNG's winter season peak day natural gas supply is provided by a single interstate pipeline, *i.e.* the Texas Eastern Transmission System ("TETCO"), which is northwest of NJNG's service area. The remaining 15% of winter season peak day natural gas is supplied by the Transcontinental Pipe Line Co. ("Transco") interstate pipeline system, provided by connections that are north of NJNG's service area. Therefore, NJNG's customers at the southern end of the system, particularly those in Ocean, Burlington and Monmouth counties are the most vulnerable and are likely to be adversely affected by a supply interruption or system failure.

5. The Southern Reliability Link Project will connect the natural gas system that serves Monmouth, Ocean and Burlington County customers to a new Transco supply point in Chesterfield, adjacent to the New Jersey Turnpike. The Project will tie into NJNG's transmission system in Manchester in Ocean County, near the southern end of the transmission system. By creating a new redundant major feed, the Southern Reliability Link Project would support the safe, reliable, and resilient delivery of natural gas NJNG's customers in Ocean, Burlington, and Monmouth counties.

6. The Project will reinforce NJNG's existing transmission infrastructure by providing an alternate means to maintain system pressure in the event of a supply interruption or system failure in the interstate pipeline, the gate station or NJNG's transmission backbone system. Hurricane Katrina and Superstorm Sandy showed the difficulty in returning service to customers after service interruptions. While the damage caused by Katrina and Sandy impacted smaller sub-systems, when applying that condition to NJNG's transmission system supplying Monmouth, Ocean, and Burlington Counties, the vulnerability to the full system is apparent.

Recent supply curtailments from TETCO in January 2014 and January 2015, caused by unplanned issues at interstate compressor stations, caused reduced delivery pressures and supply curtailment in NJNG's transmission system. NJNG was able to address the curtailments by increasing supplies from the existing Transco connections and by releasing gas from the liquefied natural gas facilities intended for peak shaving. However, neither remedy would have sustained the system in the event of a longer or more substantial interruption.

7. The route developed for this project will start in Chesterfield at a proposed Transco compressor station at 14 Bordentown-Chesterfield Road (Block 204; Lot 1). From there it will follow Bordentown-Chesterfield Road (CR 528), Chesterfield-Crosswicks Road (CR 677), Mathews Lane, private easements through three properties, and Arneytown-Chesterfield Road (CR 528) in Chesterfield. Crossing into North Hanover, the route will follow Arneytown-Chesterfield Road (CR 528), Arneytown Chesterfield Road (CR 664), private easements through two properties, and Arneytown Chesterfield Road (CR 664). In Upper Freehold, the route will follow Arneytown-Hornerstown Road (CR 27), Millstream Road, and Monmouth Road (CR 537). Through Plumsted, the route will follow Monmouth Road (CR 537), Hornerstown Road (CR 26), Pinehurst Road (CR 539), Lakewood Road (CR 528), Fisher Road (CR 24), W. Colliers Mills Road (CR 640), and Pinehurst Road (CR 539). In Jackson, the route will continue along Pinehurst Road (CR 539), which turns into Whiting-New Egypt Road (CR 539). Just before the border between the Jackson and Manchester, the route will turn into the fenced portion of the Joint Base McGuire-Dix-Lakehurst and follow the base's southern fence line along access roads, East Boundary Road, East Clubhouse Lake Road, Lakehurst Naval Air Center Taxiway, Broome Road, Lakehurst Naval Air Center Access Road, and Lakehurst-Whitesville Road, before exiting the base along CR 547. The route will then cross CR 547, continue through several easements

through private properties, then follow Lowell Road and Route 70 before ultimately terminating by tying into NJNG's existing transmission system on Colonial Drive south of NJ State Route 70 in Manchester.

8. The total length of the proposed Southern Reliability Link Project is approximately 28 miles and the scope of the project is depicted on the Alignment Drawings attached hereto as Exhibit A.

9. N. J. A. C. 14:7-1.4 requires the prior authorization and approval from the BPU for the construction and operation of any natural gas pipeline to be operated in excess of 250 psig, which pipeline is to be located within 100 feet of any building intended for human occupancy. The Project's proposed pipeline will operate in excess of 250 psig. There are 138 structures for human occupancy within 100 feet of the proposed pipeline, including approximately 127 residential structures, and 11 commercial structures. A list of each structure within 100 feet of the proposed pipeline is attached hereto as Exhibit B, and includes for each structure the lot and block number, names and addresses of owners, and distance from the proposed pipeline.

10. NJNG will place a notice in the local newspaper about a public hearing that will be scheduled on this proposed Project, a draft of which is attached hereto as Exhibit D. NJNG will also send notice of this filing to all of the property owners listed in Exhibit B, as well as the mayor and councilpersons for Chesterfield, North Hanover, Upper Freehold, Plumsted, Jackson, and Manchester.

11. The Project's proposed transmission line will be constructed of 30-inch outside diameter steel pipe with a 0.500 inch wall thickness. It will be manufactured in accordance with the applicable American Petroleum Institute ("API") Standard 5L with specified minimum yield

strength of 60,000 psi and minimum tensile strength of 75,000 psi. The Project will be constructed in full accordance with N.J.A.C. 14:7 and the Federal Regulations for the Transportation of Natural and Other Gas By Pipeline, Part 192, Title 49 of the Code of Federal Regulations (“49 CFR 192”). It is designed for Class 4 Location and will be designed to accommodate future in-line inspection (“ILI”) devices, in accordance with the requirements for passage of internal inspection devices at 49 CFR 192.150. Additionally, as required in 49 CFR 192.901 through 192.951 (Subpart O), NJNG has an Integrity Management Program in place.

12. The Project’s proposed transmission line will be subjected to 100% non-destructive testing on all welds and a minimum of 1,500 psig of hydrostatic test pressure for 24 hours. As part of this test, it will be subjected to a strength test pressure of approximately 1,800 psig for no greater than one hour, intended to produce 90% of its Specified Minimum Yield Strength. As a result, the MAOP of this section of 30-inch main will be rated at 722 psig, an equivalent MAOP to that of NJNG’s existing transmission system. The engineering specifications are detailed on Exhibit C, “Pipeline Engineering Data Sheet.”

13. Route studies were performed to determine a route that will minimize and balance the impact to the natural environment and the built environment, taking into consideration the feasibility of constructing the Project. Of the feasible buildable alternatives, the selected route represents that alternative with the least impacts. The Alternatives Analysis is attached hereto as Exhibit E.

14. The Southern Reliability Link Project was developed as a redundant supply line to an existing system in which additional growth of the system was not taken into account during its design, so no Smart Growth impact is anticipated.

II. REQUEST FOR EXPEDITED RELIEF

15. The construction of the proposed Southern Reliability Link Project has been designed to provide needed reliability and supply security to Ocean, Burlington, and Monmouth Counties. As such, an expedited review of this Petition is requested to avoid any delays in the completion of this pipeline.

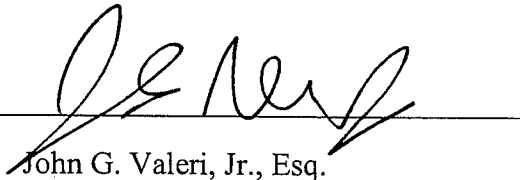

WHEREFORE, NJNG respectfully requests that the BPU:

- (1) Retain jurisdiction over this matter and designate a Commissioner as Presiding Officer;
- (2) Approve NJNG's request to construct and operate the Southern Reliability Link Project, approximately 28 miles of 30-inch transmission pipeline with an MAOP of 722 psig in Chesterfield, North Hanover, Upper Freehold, Plumsted, Jackson, and Manchester, as previously described;
- (3) Approve NJNG's request for approval of such planned construction on an expedited basis to permit NJNG to start construction as soon as possible; and
- (3) Approve any other relief deemed just and equitable.

Respectfully submitted,

Wolff & Samson PC

PIPELINE ENGINEERING DATA SHEET

Project Name: Southern Reliability Link (SRL)

Location: (Bordertown-Chesterfield Road (CR 528), Chesterfield-Crosswicks Road (CR 677), Mathews Lane, and Arneytown-Chesterfield Road (CR 528) in Chesterfield Township, Burlington County, NJ. Arneytown-Chesterfield Road (CR 528), and Arneytown-Chesterfield Road (CR 664), in North Hanover, Burlington County, NJ. Arneytown-Hornerstown Road (CR 27) and Millstream Road In Upper Freehold Township, Monmouth County, NJ. Monmouth Road (CR 537), Hornerstown Road (CR 26), Pinehurst Road (CR 539), Lakewood Road (CR 528), Fisher Road (CR 24), W. Colliers Mills Road (CR 640), and Pinehurst Road (CR 539) in the Township of Plumsted, Ocean County, NJ. Whiting-New Egypt Road (CR 539) in Jackson. East Boundary Road, East Clubhouse Lake Road, Lakehurst Naval Air Center taxiway, and Broome Road in the Joint Base McGuire-Dix-Lakehurst (Jackson Township), Ocean County, NJ. Broome Road, Lakehurst Naval Air Center Access Road, and Lakehurst -Whitesville Road in the Joint Base McGuire-Dix-Lakehurst (Manchester Township), Ocean County, NJ. CR 547, Lowell Road, and State Highway 70 in Manchester Township, Ocean County, NJ.

Calculations by: Keith Sturn

Date: 1/05/15

Pipe Material: Grade X-60 steel
 Pipe length: 144,000 linear feet
 Pipe coating: Pritec and Fusion Bonded
 Epoxy w/ Powercrete

Type of fittings: WPHY - 60
 Type of flanges: ANSI 600
 Type of valves: ANSI 600

Design code: **API-5L**

SMYS	: specified minimum yield strength	=	60,000	psi
OD	: outside diameter of pipe	=	30.000	in.
t	: wall thickness of pipe	=	0.500	in.
F	: design factor (type D, class 4 location)	=	0.400	
E	: longitudinal joint factor (ERW)	=	1.000	
T	: temperature derating factor (< 250 deg. F)	=	1.000	
MAOP	: maximum allowable operating pressure	=	722	psig
MOP	: maximum operating pressure	=	722	psig
inside diameter of pipe:		=	29.000	in.
design pressure:	$P = [2 (SMYS) \times t \times F \times E \times T] / (OD)$	=	<u>800</u>	psi
hoop stress at MOP:	$SMOP = (MOP \times OD) / (2t)$	=	<u>21,660</u>	psi
hoop stress at MOP as a % of SMYS:	$(SMOP \times 100) / (SMYS)$	=	<u>36.10</u>	%
hoop stress at MAOP:	$SMAOP = (MAOP \times OD) / (2t)$	=	<u>21,660</u>	psi
hoop stress at MAOP as a % of SMYS:	$(SMAOP \times 100) / SMYS$	=	<u>36.10</u>	%
Test pressure (90% of SMYS)	$[2 (SMYS) \times t \times 0.9] / OD$	=	<u>1800</u>	psig

NOTICE OF FILING AND PUBLIC HEARING

IN THE MATTER OF THE PETITION OF NEW JERSEY NATURAL GAS COMPANY FOR APPROVAL AND AUTHORIZATION TO CONSTRUCT AND OPERATE THE SOUTHERN RELIABILITY LINK PURSUANT TO N.J.A.C. 14:7-1.4

PLEASE TAKE NOTICE that on April 2, 2014, New Jersey Natural Gas Company ("NJNG") filed a Petition with the New Jersey Board of Public Utilities ("Board") requesting that the Board issue an Order pursuant to N.J.A.C. 14:7-1.4 approving the installation and operation of the Southern Reliability Link Project (the "Project"), which will operate in excess of 250 psig within 100 feet of 138 buildings intended for human occupancy. Owners and residents of those 138 buildings have received personal notice. The Project is an approximately 28 mile, 30-inch natural gas pipeline with an alignment that runs through the townships of Chesterfield, North Hanover, Upper Freehold, Plumsted, Jackson, and Manchester. Pursuant to N.J.A.C. 14:7-1.4, the Project will comply with 49 CFR 192, including the requirements for passage of internal inspection devices at 49 CFR 192.150, and for an integrity management program in Subpart O, 49 CFR 192.901 through 192.951.

PLEASE TAKE FURTHER NOTICE that the Board will conduct a public hearing for the purpose of receiving comments from the public regarding the Petition. A public hearing will be held at the following time and location:

DATE and TIME
Township
Street
City, NJ ZIP

A representative of the Board will preside at the hearing. The public is invited to attend and interested persons will be permitted to testify and/or make a statement of their views on the proposed Petition. In order to encourage full participation in this opportunity for public comment, please submit any requests for needed accommodations, including interpreter, listening devices, or mobility assistance, at least 48 hours prior to the hearing, to the attention of the Board Secretary at the address below. Interested parties may also submit comments regarding the Petition to the attention of Honorable Kenneth Sheehan, Secretary, New Jersey Board of Public Utilities, 44 South Clinton Street, 9th Floor, P.O. Box 350, Trenton, New Jersey 08625-0350. Comments, if any, should be identified with the heading "In the Matter of the Petition of New Jersey Natural Gas Company for Authorization and Approval for Construction of the Southern Reliability Link Pursuant to N.J.A.C. 14:7-1.4."

Copies of the Petition are available for public inspection during regular business hours at the Board's office at 44 South Clinton Avenue, Trenton, New Jersey 08625, and online at SRL@njng.com
