**Subject:** South Jersey Gas - Requested additional information

Good morning Branwen,

On Friday you requested a breakdown of the existing surface conditions where the proposed pipeline would be constructed just within the Pinelands. Following is that breakdown:

Total length of Pipe to be installed within the State Pinelands jurisdiction = 78,446 L.F.

1. Pipe to be located in the Paved Travel Way = 11,535 L.F = 14.7%
2. Pipe to be located in the Paved Shoulder = 15,107 L.F = 19.2%
3. Pipe to be located in the Grass Shoulder = 43,110 L.F = 55.0%
4. Pipe to be installed using Trenchless Technology (J&B/HDD) = 8,694 L.F. = 11.1 %

I believe this is the breakdown you requested, if you need anything more please call or email me.

Thanks

Steven R. Ewing
