

The Honorable Philip Murphy
Governor of New Jersey
PO Box 001
Trenton, NJ 08626

Dear Governor Murphy,

The Pinelands National Reserve needs strong, dedicated advocates willing to stand up to influences that would damage this unique area. From pipelines to off-road vehicle damage to increasing development pressure, the Pinelands is at risk. Now more than ever.

The Pinelands Commission is the guardian of the rules that protect the Pinelands. Starting under Governor Christie and now under your administration – the Commission has become a shell of its former self. It is severely weakened and unwilling to defend the Pinelands and enforce the rules that were created 40 years ago.

I can't rely on the Pinelands Commission, the Senate, the Department of Environmental Protection, or even the courts to protect the Pinelands from harmful and needless construction.

What are you going to do?

You must overcome the roadblock that has stopped your highly qualified nominees from being confirmed to the Pinelands Commission.

Don't allow the state of New Jersey to abandon the Pinelands National Reserve.

Sincerely,
